

**Carrier Northeast in cooperation with
Eastern Heating & Cooling Council presents
NATE Core, Heat Pump, and Air Conditioning Review with Exam**

**Everyone Benefits
from Technician
Certification by**

Support It!

Proper preparation is essential in achieving NATE certification. This course was designed to translate the knowledge technicians already use in the field into test-taking readiness. By reviewing the basics of electricity, the refrigeration cycle, and troubleshooting, this course is an excellent preparation for the Core, Air Conditioning and/or Heat Pump exams. Many rewards come from successful completion of the NATE exam. Not only will it enhance public perception of the HVAC trade as a whole, NATE certification generally translates into increased marketability, higher pay and improved job security. Your participation in the NATE certification program says a lot about how you feel about your career in the HVAC industry. It will demonstrate your commitment to professionalism.
